Unusual Fire and Explosion
Hazard

Moderately explosive when exposed to flame or chemically reacted. Vapor from this product, may travel or be moved by air currents and be ignited by pilot lights, other flames, sparks, heaters, electrical equipment, static discharges or other ignition sources at locations distant from handling point.

Small Fire

Dry chemical powder, CO2 & water supply.

Large Fire

Water spray, fog or foam. Move containers or drums from fire area if you can do it without risk. Cool containers that are exposed to flames with water from the sides until / and after fire is out.

6) EMERGENCY AND FIRST AID MEASURES UPON EXPOSURE TO THE MATERIAL:

Swallowing

Do not induce vomiting. Keep patient at rest. Seek immediate medical attention.

Inhalation

Move victim to fresh air, call emergency medical care. If not breathing give artificial respiration. If breathing is difficult give oxygen.

Skin Contact

Remove contaminated clothing and wash affected area with soap and water. Seek Medical advice.

Eye contact

Immediately flush eyes with running water for at least 15 minutes. Get medical care without delay.

7) STABILITY & REACTIVITY DATA:

Stability

Stable

Hazardous Combustion or
Decomposition products

Burning may produce carbon monoxide and/or carbon dioxide. When heated it emits irritating fumes, can react vigorously with oxidizing materials.

Hazardous polymerization

Will not occur.

Condition to avoid

Heat, Sparks, build up of static charge.

8) ACCIDENTAL RELEASE/SPILL/LEAK MEASURES:

Steps to be taken if the material is released or spilled :

1. Notify safety personnel of leaks or spills.
2. Eliminate all sources of ignition until area is determined to be free from explosion hazard.
3. Provide adequate ventilation & instruct personnel to use protection against liquid contact and vapor or mist inhalation.
4. Contain spill by diking
5. Small spills could be washed away to the API separator or may be contained by using absorbents. Large spill after diking should be recovered by pumping (Use explosion proof pump).
6. Stop leak if you can without risk.
7. Use water spray to reduce vapors.

9) DISPOSAL CONSIDERATION:

Disposal Method

Incinerate in a special furnace or if the quantity is small expose for weathering, abide to local regulations. Other disposal method is burial in approved land fill.

10) EXPOSURE CONTROLS/ PERSONAL PROTECTION EQUIPMENT FOR DEALING WITH THE MATERIAL:

Respiratory Protection
Ventilation

Use gas mask for respiratory protection.
Provide adequate ventilation where operating conditions may create excessive vapors or mists. This product should be confined within closed containers in which case general (mechanical) ventilation should be sufficient. Use explosion proof equipments. Special local ventilation is recommended at points where vapors can be expected to escape to the work place air.

Hand/Body Protection
Eye Protection

Use PVC or Neoprene gloves/Impermeable aprons.
Chemical splash goggles. An eye wash fountain and washing facilities to be readily available near handling areas.

11) HANDLING & STORAGE:

Handling

Use non sparking tools and explosion proof electrical equipments; Prevent static electric spark by grounding transfer equipment; Avoid breathing vapors; Use with adequate ventilation; Don't get in eyes or skin or clothing, wash thoroughly after handling; Call safety for any problem.

Storage
