

Safra *Coal*TM

CHARCOAL
LIGHTER
ODORLESS

SPECIFICATIONS

Safra Coal™

(Odorless Charcoal Lighter)

Description:

Safra Coal™ is Odorless Charcoal Lighter fuel to ignite wood and charcoal (brick and wooden both) developed for cooking or warming up.

Composition:

Safra Coal™ is composed of low-odor distillates of petroleum.

Specification:

Boiling Range	: 150-205°C
Freezing Point	: -
Specific Gravity (Water = 1)	: 0.760-0.790
Vapor Density (Air = 1)	: -
Vapor Pressure (mPa)	: Not defined
Solubility in Water	: Insoluble
Evaporation	: 550
(Butyl Acetate = 1)	
Flash Point	: >40°C

Uses:

Barbecues – Charcoal Grills – Campfires.

Advantages:

1. As the contents of Safra Coal™ are low-odor, the food cooked or grilled by igniting it, has no smell whatsoever but a natural charcoal broiled flavor comes through.
2. During campfire, no irritation in nose or eyes is caused as the effluent gases produced during ignition of charcoal are smoke free.

Note:

Value indicated describe typical properties and do not constitute specification limits.
